## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 6,9-24,33-36,38,40,42, having specific antenna arrangement in the base station, classified in class 455, subclass 562.1.
  - II. Claims 25,27-31, drawn to radiotelephone equipment detail in the mobile station, classified in class 455, subclass 550.1.
  - III. Claims 37,39,41,43, drawn to calculating Doppler frequency, classified in class 342, subclass 378.
2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Base Station has separate utility such as Mobile Station. See MPEP § 806.05(d).
3. Inventions I and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because decoding or extracting the forward fading coefficient. The subcombination has separate utility such as calculating Doppler frequency.

4. Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions calculating Doppler frequency.

5. A telephone call was made to Mr. Peter G. Dilworth on 5-18-05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
